Forecast for Tuesday 15 Mar 2022

Weather: Rain spreading into the west coast before dawn. Patchy rain, snow above 700m, then affecting western ranges at times through the day, snow level rising to 900m this afternoon. The east of the region should see some drier spells of weather. Becoming dry with the odd clear spell along the west coast around late evening.

Chance of cloud-free hill tops above 800m: 30-40% in the morning, falling to nil in the afternoon.

Low cloud and visibility: Increasingly poor at height as cloud lowers. Moderate at low levels, falling to a few km in heavier outbreaks of rain. Cloud bases lowering to around 800m near the west coast, 900-1000m in the east by dawn. Cloud then gradually lowering to around 600m through the day in the west.

Met Office Aberdeen Meteorologist's View

Severe gales across the summits for much of the day will have the potential to lift you off your feet. Note freezing levels are expected to be 100-200m higher than indicated along the west coast.

Forecast for Wednesday 16 Mar 2022

Weather: Mainly dry with clear spells developing from the west through the early hours. Then a bright day with sunny spells, the best of these in the afternoon. A few showers in the morning and evening, mainly near the west coast.

Maximum wind: Southwest 15 gusting 25 mph.

Chance of cloud-free hill tops above 800m: 80%

Low cloud and visibility: Generally very good with brief reductions in passing low cloud and showers. Broken patchy cloud dropping to around 1000m, occasionally 800m in showers near the west coast during the morning and evening.

Temperature: **Glens:** Plus 1 Celsius rising to 8 Celsius

At 800m: Minus 2 Celsius rising to plus 1 Celsius, falling to minus 3 Celsius late evening.

Freezing level: Around 800-900m, dropping to 600m by afternoon, then 400-500m in the evening.
